# How to read our catalogue

## Arrangements

Single and mixed flower types and foliage, in a stunning range of planter colours, shapes and sizes.

Please note that due to the huge range and ever changing variety of our arrangements range, we have displayed only the most popular items in this category. For the full list of available options, please ask to see our arrangement catalogue.

## Stem Flowers

Our stemmed flowers collection draws upon a regularly changing list of alpine, equatorial, temperate and tropical species that provide for seasonal refreshing of indoor and outdoor floral displays and landscaping.

Pairing the brightly coloured and often spectacular displays of our stemmed flowers with the muted variegations and shades of our underplanting range permit a depth of presentation that only untamed Mother Nature can unleash.

All the flowers in this collection are botanically accurate and incredibly detailed - at arms length it is often impossible to decide which are living flowers and which are artificial.

## Plants & Underplanting

Our extensive ranges of plants and underplanting provide everything you need to recreate English country gardens, jungle settings, and high sierra desert outcrops... and much, much more.

Bring the colourful and exotic to your indoor and outdoor landscaping and planting, or express conservatism with traditional favourites.

Whichever setting or style you choose, there's also an extensive choice in our fire retardant or sunlight resistant FIREsilx™ and UVsilx™ options.

## Foliages & Leaves

An extensive collection of foliage and leaf-sprays for creating artificial bushes, shrubs, trees, and undergrowth, featuring many of the world's favourite types. We also offer choice of with or without fruits where applicable - for example apples, acorns, and olives, plus several others.

Seasonal variations are provided for many species, allowing you to rotate between Spring, Summer and Autumnal presentations to retain authenticity and interest in your interior and exterior landscaping.

Most products in this category are now available in FIREsilx™ inherently fire retardant materials, with a rapidly growing selection now also available in UVsilx™ sunlight-resistant colourfast materials.

## Grasses & Rushes

Ornamental grasses for indoor and outdoor use where a touch of formality is needed to keep things smart.

A variety of grass types is available, each in assorted lengths and colours. For meadow-style planting, several options with seed heads and additional broadleaf plants included.

Grasses and rushes display best in non-complex plantings using smooth sided planters in neutral colours. Rushes are invaluable for adding height with a small footprint, and often used in alcoves and room corners.

Our grasses and rushes collection varies constantly, therefore the examples shown in this section may change several times per year.

## Natural Trunk Trees

Our natural trunk trees range is a craftsman's selection of pre-assembled shrubs and trees up to 3 metres tall originally intended for indoor landscaping. Today, the range is increasingly used outdoors, and in large public spaces under cover with plentiful sunlight. Some deployments have been in-situ for many years and remain as lustrous and full-coloured as the day they arrived.

FIREsilx™ inherently fire retardant artificial foliage for indoor use enhances our range of standard artificial foliage on natural timber trunks creating realism inspired by nature.

## Topiary

Our pre-made topiary is supplied in a variety of classical shapes inspired by locations such as the Gardens of Versailles.

These fully pre-assembled, off-the-shelf and boxed topiaries can be supplied as-is, or they can be customised with stems or mounted into planters before dispatch to you.

Most of our topiaries offer the variation of FIREsilx™ inherently fire retardant foliage for indoor safety, or UVsilx™ sunlight-resistant colourfast for outdoor use.

We also offer topiary mats for covering your own shape forms and walls, lending infinite possibility to your projects.

## Planters & Pots

A mixed range of large and small planters and pots in classical, traditional, and contemporary styles.

Varying from simple forms to elegant reproductions of historical styles, many are available from stock whilst some are bespoke made-to-order items.

All planters and pots are available alone and empty, or pre-planted as shown in other parts of our catalogue. For bespoke and custom combinations, please contact our sales team.

## Hand-built Standard Greenwall Panels

Mixed flower and foliage types, in the most popular collections, for maintenance-free vertical gardens and space dividers.

Please note that our bespoke production department can create panels in any size or shape to meet your project needs. For many years we have custom-built mosaic and jigsaw style collections for covering irregular-shaped and very large surfaces.

Our greenwall panels use FIREsilx™ or UVsilx™ flowers, foliage and plants. Custom collections can be applied to suit your interior and exterior projects.

All Greenwall prices  
are per square metre

## Woods & Materials

We collect decorative and exotic woods from many countries, ensuring sustainability in our origins. Additionally, we purchase standard British timbers from managed woodlands that have a strong replanting policy.

We now also manufacture artificial stems and trunks in a range of shapes and barks. However, for those customers requiring the authenticity of natural timbers we continue to stock a wide variety for building natural timber trunked trees and shrubs.

Four Seasons Hotel, Bahrain, one of 17 full-size reproduction Olive trees designed, produced, and installed by TreeLocate

## Premiere Bespoke

For almost 20 years, TreeLocate have been supplying the interior landscape industry with custom-made reproduction trees using a combination of preserved natural trunks and branches with artificial foliage in either inherently fire retardant or UV and fade resistant materials.

With requirements specified by architects, designers, and landscapers, our Bespoke Production teams make to order the trees and shrubs required for prestigious and modest projects alike.

Specialist fabrication units, such as our CAD/CAM CNC room and the moulding, casting and coatings bay supported by the fully trained metal fabricators prepare the structural frameworks, which are then hand finished by skilled artisans before being foliated by our highly experienced tree builders.

Stunningly realistic and inspired by nature are hallmarks of our Premiere Bespoke custom-made trees and shrubs.
